Subject: FW: Hunters Point Tetra Tech radiation cleanup called into question

Hi Nadia,
Thank you for pointing this out. I had no idea this was happening at all.

Nadia,

Our rad contractor has been Shaw and now CB&I -- not Tetrattech. I am not aware of any individuals involved in the HP affairs that are involved in TI affairs. Tetrattech EMI is our contractor for administrative/meeting support; this should not be confused with Tetrattech ECI, which did some of the rad work at HP.

You accurately point out that these are serious accusations leveled at one specific contractor and, as the TI BEC, it isn't appropriate for me to comment on it. We do have a BRAC Public Affairs officer, Bill Franklin, who I'm sure will be engaged on any questions that arise from this.

V/r,
KF

Hi TI team-I just became aware of this report that reveals Tetra Tech falsified radiation sampling/cleanup results at Hunters Point. This is a very serious accusation and extremely concerning. Are you all aware of this, and has this been looked into for Treasure Island? For example, did any of the same Tetra Tech people work on TI overseeing the radiation sampling? I would assume this will bring attention to the work being done at TI, and I would like to know what the Navy and State response plans to be.
